

Webmasters Report 2022

- **This year I used an online form connected with a new gmail address in hopes of providing more reliable connections for our registrants. I hope that this has made it easier for you to register with us.**
- **During the 2021 annual meeting we had up to 95 connections active in three countries and ten states with 120-130 individuals listening in. Video copies of those sessions are still available on our web pages.**
- **Over the last year we have had 181,000 web pages viewed with over 260,000 files accessed! Granted, much of that may be due to robots, but even robots supply information about us to their viewers.**

- **Fellesraad has purchased a copy of “Zoom Pro” for a 2nd year which allows us to run meetings of up to one hundred participants for as long as 24 hours per session. It is possible to run multiple sessions concurrently using different hosts. During the past year several Lags have used our copy for their officers’ meetings and other lag activities.**
- **If your lag would like to use our Zoom copy for your meetings or other activities, please contact me about scheduling time. I will setup your connection and assign a Host from your group to run your meeting. We have found that this can provide efficient, meaningful participation for our own officers’ meetings without the costs and concerns of travel or weather for our members.**

- **Please look over your information on the Fellesraad Lag Information pages. We want you to have the most current information presented there. Report any changes to me so I can get them entered for you.**

- **Also look at your data on the latest copy of ”Explore Your Norwegian Roots” found under the Documents tab of our web page. We hope to publish this again soon so that it can be sent out to Libraries, Norwegian organizations and Lags as needed.**
